DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kikuchi et al. 6666871.

3. Kikuchi et al. teach an intraocular lens insertion instrument including: a cylinder provided with an insertion part; a push out unit which is mounted axially movably in the cylinder; an elastic member which is set in contact with the push-out unit and deformed under pressure and an adjustment member which adjusts a deformed state of the elastic member, to adjust working pressure needed to move the push-out unit by changing frictional force on the push-out unit according to the deformed state of the elastic member; and wherein the elastic member includes an O-ring (col. 6, lines 16-23).

Allowable Subject Matter

4. Claims 6, and 9-12 are allowable over the prior art of record.

5. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
